

EC 564 ELECTRIC CLEANER

GENERAL DESCRIPTION

Norchem EC 564 is a safe and economical cold solvent cleaner which is specially designed for the cleaning of electrical components.

ADVANTAGES

- High flash point means more safety
- Provides fast, efficient and complete cleaning
- Slow evaporation rate, emits less vapour, making it safer to use in a confined area
- Non-conducting and non-corrosive
- Improves electrical performance
- Superior solvency

USES

Norchem EC 564 is used for the cleaning and degreasing of oil, grease, dirt, wax and carbon particles from electric motors, generators, electrical components, metal parts and other similar equipment where the use of water-based cleaners are not acceptable or undesirable.

USE DIRECTIONS

Use as supplied and apply by spraying, swabbing, brushing or soaking. Allow sufficient cleaning time before blowing off with compressed air or allow to air dry.

PRODUCT SPECIFICATION

Appearance	: Clear, easy flowing liquid
Flash Point	: 82 °C to 90°C
pH	: 6.5 to 8.2
Odour	: Characteristic sweetish odour
Stability	: 2 years when stored under sealed cover
Specific Gravity	: 1.1 – 1.25
Vapour Density	: Heavier than air

HANDLING PRECAUTIONS

Contains chlorinated solvents. Avoid contact with skin or eyes. Flush with copious amount of water if contacted and seek prompt medical attention for the eyes. Avoid inhaling vapours. Use only with adequate ventilation and keep away from open flames or welding arcs. Harmful if swallowed.

PACKAGE

Supplied in 20 or 25 litres container.
