Symptoms of poisoning may occur even after several hours; therefore medical observation is suggested for at least 48 hours after the accident. Immediately remove any clothing soiled by the product.

General Advice

Eye Contact	Rinse opened eye for several minutes under running water. Then consult a doctor.
Skin Contact	Immediately flush with water for at least 15 minutes.
Inhalation	Supply fresh air; consult doctor in case of complaints.
If swallowed	Rinse out mouth and then drink plenty of water. Seek medical treatment.

4.2 Most important symptoms/effects, acute and delayed

No data available

5. FIRE-FIGHTING MEASURES

5.1 Suitable extinguishing media

Water spray, foam, dry chemical, or carbon dioxide

5.2 Specific hazards arising from the chemical

Sodium oxides, Silicon oxides, Phosphorus oxides, Potassium oxides, Carbon monoxide (CO) - these toxic gases may be released in case of fire,

5.3 Special protective actions for fire-fighters

Firefighters, and others exposed, wear self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Avoid contact with skin & eyes. Use chemical resistance gloves, goggles to prevent direct contact with body tissues. Hazard identification Section for Significant Hazards. See Section 4 for First Aid Advice. Use personal protective clothing. Information regarding personal protective measures see, section 8. depending on the specific circumstances and/or the expert judgment of the emergency responders. For emergency responders: Respiratory protection: half-face or full-face respirator with filter(s) for vapours/aerosol. Small spills: chemical resistance apron is usually adequate. Large spills full body suit of chemical resistant is recommended.

6.2 Environmental precautions

Do not allow product to reach sewage system or the environment. Inform respective authorities in case of seepage into water course or sewage system. Do not allow to penetrate the ground/soil. Inform responsible authorities in case of seepage into the ground.

6.3 Methods and materials for containment and cleaning up

Recovery : Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13).

Sweep up or vacuum up spillage and collect in suitable container for disposal.

Never return spills in original containers for re-use.

Decontamination/cleaning : Clean contaminated surface thoroughly.

Wash non-recoverable remainder with large amounts of water.

Recover the cleaning water for subsequent disposal.

Decontaminate tools, equipment and personal protective equipment in a segregated area.

Neutralization : Absorb non-recoverable liquid with: Sand

Disposal : Dispose of in accordance with local regulations.

Additional advice : Material can create slippery conditions.

7. HANDLING AND STORAGE

7.1 Precautions for safe handling

Advice on safe handling and usage :

Handle in accordance with good industrial hygiene and safety practice.

Avoid splashes. Avoid the formation or spread of mists in the atmosphere.

Avoid inhalation, ingestion and contact with skin and eyes.

Hygiene measures :

Emergency equipment immediately accessible, with instructions for use.

Ensure that eyewash stations and safety showers are close to the workstation location.

Regular cleaning of equipment, work area and clothing.

Use clean, well-maintained personal protection equipment.

Store personal protection equipment in a clean location away from the work area.

Keep working clothes separately. Contaminated work clothing should not be allowed out of the workplace.

Contaminated clothing must never be washed or reused.

Wash hands before breaks and immediately after handling the product. When using do not eat, drink or smoke.

The product must only be handled by specifically trained employees.

8.2 Appropriate engineering controls

A system of local and/or general exhaust is recommended to keep employee exposures below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area.

8.3 Individual protection measures, such as personal protective equipment (PPE)

General	Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing. Do not inhale dust I smoke I mist. Vacuum clean contaminated clothing. Do not blow or brush off contamination.
Hand Protection	Wash hands before breaks and at the end of work. Wear Protective gloves (Check protective gloves for proper condition before use). To avoid skin problems reduce the wearing of gloves to the required minimum. Preventive skin protection by using skin-protecting agents is recommended. After use of gloves apply skin-cleaning agents and skin cosmetics.
Eye protection	Wear tightly sealed goggles & Avoid contact with the eyes.
Skin Protection	Wear protective work clothing & Avoid contact with the skin. Use skin protection cream for skin protection.
