

Sanitizing Disinfectant

DESCRIPTION

Norchem Sanitizing Disinfectant is an alcohol-based antiseptic formulation specially created to sanitize and disinfect most types of hard and soft surfaces and equipment. Excellent for use in clean rooms, hospitals, transport and food and service industries.

Product being an alcohol-based cleaner will eliminate bacteria by causing disruptions to the cell membrane plus inactive certain enveloped viruses.

ADVANTAGES

- Effective against both gram negative and gram positive bacteria.
- Fast drying – allows for relatively uninterrupted production
- Non-toxic; safe to use on hands and skin
- Kills 99.99% bacteria

APPLICATION

- 1) Spray or apply a small amount of the disinfectant onto the hard surfaces or equipment and wipe off with a clean cloth or paper tissue. The disinfecting liquid will vaporize within 15 seconds leaving behind a clean and bacterial free surface.
- 2) Suitable to be used as a hand sanitizer. Rub a small amount onto both hands and leave to dry

NOTE: Care should be taken when spraying on polish/varnished surfaces as the alcohol can cause blurring to such surfaces.

PROPERTIES

Appearance : Clear Liquid
Alcohol : 70%
Odour : Mild Solvent
pH : 6 +/- 0.5

TEST REPORT: BS EN 1040:2005 STANDARDS

PRECAUTION

Avoid contact with eyes. If contacted, open eyelids and flush with plenty of water. Skin irritation is not an expected route of exposure. If irritation occurs, rinse with plenty amount of water. If swallowed, rinse mouth at once and drink large amount of water. Do not induce vomiting. Users are recommended to wear gloves during cleaning operations.

PACKAGE

- 500ml pump or spray bottle, 1 liter, 4 liter & 5 liter can
- 20 liter and 25 liter pail

STORAGE

Store in a cool dry place away from direct sunlight. Always ensure container is covered after use.
